

T.C. 131

Rust Preventative & Light Drawing Compound

DESCRIPTION

T.C. 131 is a liquid concentrated additive for industrial operations. It provides rapid sheeting of the work for spot-free and streak-free parts. T.C. 131 reduces drying time and thus reduces the chance for flash rust to develop. This product will also provide film strength for light draws.

USE

Actual concentrations of T.C. 131 are dependent upon the individual operating conditions of the system. The concentration is usually maintained between 10% to 20% by volume with water. Best results are obtained when an operating temperature of 100°-120°F is maintained.

SPECIFICATIONS

Form	Clear Liquid
Wetting	Excellent
Biodegradable	Yes
Rinseability	Excellent
Odor	Mild

CAUTION

Mildly alkaline. Avoid contact with skin and eyes. Should contact occur, flush skin and eyes with copious amounts of water for 15 minutes.

DO NOT TAKE INTERNALLY.
