

T.C. 244

Mildly Acid Barrel Finishing Compound for Ferrous and Non-Ferrous Metals

PRIMARY APPLICATION

A liquid acid cleaning compound designed for use in barrel finishing operations where high detergency and brightening action is required. T.C. 244 may be used with or without media involving steel, aluminum, zinc or copper base parts. Oxides will be removed.

CONDITIONS OF USE

Concentration	2-15% by volume
Temperature	Room temperature
Time	As required

Adjust the above conditions as required for best results.

HANDLING

Avoid skin and eye contact. It is advisable to wear rubber gloves, goggles, rubber apron and proper protective clothing and shoes when handling or making up solutions. In case of accidental contact, immediately flush eyes and skin with large amounts of water and get medical attention if necessary. Remove contaminated clothing and wash before re-use. Do not take internally. For industrial use only.
